CleanPlex[®] OncoZoom[®] Cancer Hotspot Panel

Rapid survey of hotspot regions in 65 oncogenes and tumor suppressor genes

Highlights

- Relevant Gene Content Target 2,900+ hotspots in 65 genes with known cancer associations
- Fast, Single-Tube Workflow Generate sequencing-ready libraries in just 3 hours using a three-step, single-tube protocol
- Superb Performance Prepare high-quality NGS libraries with excellent on-target performance using CleanPlex[®] Technology to enable efficient use of sequencing reads and reduce costs

The CleanPlex[®] OncoZoom[®] Cancer Hotspot Panel is a multiplex PCR-based targeted resequencing assay designed for rapid detection of somatic mutations across the hotspot regions of 65 oncogenes and tumor suppressor genes. Starting with just 10 ng of DNA, sequencing-ready libraries can be prepared using a single-tube workflow in just 3 hours. The panel is optimized to deliver data with high on-target performance and high coverage uniformity to ensure efficient use of sequencing reads.

CleanPlex Single-Tube Workflow

The CleanPlex OncoZoom Cancer Hotspot Panel offers a simple and streamlined workflow. Starting from purified and quantitated DNA, the multiplex PCR-based protocol can be completed in just 3 hours, with 75 minutes of hands-on time, using a three-step, single-tube workflow to minimize sample loss and handling errors. Each step consists of a thermal cycling or incubation condition, followed by "with bead" purification using magnetic beads.

3 hours of total assay time, 75 minutes of hands-on time

Sensitive Detection

The CleanPlex OncoZoom Cancer Hotspot Panel allows detection of somatic mutations down to 1% frequency using 10 ng of input DNA. With an average amplicon size of 146 bp, the panel is also compatible with degraded samples such as DNA isolated from FFPE tissues.

CleanPlex Background Cleaning Chemistry

The CleanPlex OncoZoom Cancer Hotspot Panel is powered by Paragon Genomics' CleanPlex Technology, which uses a proprietary multiplex PCR background cleaning chemistry to effectively remove non-specific PCR products, resulting in best-in-class target enrichment performance and efficient use of sequencing reads.

Ordering Information

The CleanPlex OncoZoom Cancer Hotspot Panel contains CleanPlex Multiplex PCR Primers and CleanPlex Targeted Library Kit. CleanPlex Indexed PCR Primers and CleanMag[®] Magnetic Beads are ordered separately to complete the workflow from input DNA to sequencing-ready NGS libraries.
